Stain & rust Buster S.R.B **APPLICATION INSTRUCTIONS**

STONEHENGEUS CLEANERS

PRODUCT DESCRIPTION:

S.R.B. is a powerful concentrated spot cleaner that dislodges and removes many common organic stains without damaging the surface when following dilution instructions. Its biodegradable, environmentally friendly formula works well on moss, mildew, leaf, rust, blood, beverage spills and non-greasy food stains. S.R.B. can be used outside, on old and new, horizontal or vertical surfaces to remove stains before cleaning the surface overall with StonehengeUS's SureClean or Efflo Off. S.R.B.'s Clean Rinse Technology allows dirt and cleaner residue to be quickly and easily rinsed away with a low or high pressure washer. S.R.B. is concentrated and requires dilution prior to use. With proper dilution, DILUTION RATIOS: S.R.B. it is safe to use on surfaces sealed with StonehengeUS sealers.

FEATURES	BENEFITS		
Powerful Targeted Cleaning Action	Cleans a WideRangeofOrganic, Non-Greasy Stains Attacks Stains in Minutes		
Fast Acting			
Safe For Most Surfaces	Does Not Damage or Etch Surfaces with Proper Dilution		
Environmentally Friendly	Biodegradable Customize Strength to Match Cleaning Needs Dirt and Cleaner Residue Rinses Away Easily		
Concentrated Formula			
Clean Rinse Technology			

SUITABLE SURFACES:

Suitable for concrete and clay pavers, flat concrete, masonry, natural stone, segmental retaining wall blocks, concrete walls and exposed aggregate. Can also be used on tile, terrazzo and stucco. Safe to use on old or new surfaces in outside environments. Use caution on sensitive surfaces such as wet cast pavers, manufactured stone and stamped concrete as it may cause damage to the color of the surface. Not for use on asphalt. Test first to verify suitability, dilution rate and dwell time before cleaning.

COVERAGE PER GALLON OF DILUTED PRODUCT:

APPLICATION	SQ FEET	SQ METERS
All Surfaces	100 -250	9.3 – 23.2

Coverage based on single treatment. Some applications may require additional treatments. Coverage rate may vary depending on the surface porosity, texture, severity of staining, application method and local conditions.

PREPARATION/PRE-TESTING:

Remove all loose soil anddebrisfrom the surface. Inspect area for visible staining to determine stain types and quantity. Cover and protect adjacent and surrounding surfaces not intended to be cleaned. **TEST FIRST:** Before using S.R.B., test on a small inconspicuous area following the application instructions to determine suitability, correct dilution and dwell time needed for your surface. Allow test area to dry thoroughly before evaluating final appearance and results.

DILUTION INSTRUCTIONS:

S.R.B. requires dilution with water prior to use. Amount of dilution is dependent on severity of staining and if surface has been previously sealed. Only use strength of dilution needed to sufficiently clean. Under dilution (too strong) may cause damage to the substrate. To make a dilution that is ready-to-use, pour the desired amount of S.R.B. into an empty and clean quart or gallon size container. Fill the balance of the container with water and mix.

DILUTION RATIO (Water:S.R.B.)	Neededfor 1 ready-to-use quart	S.R.B. Neededfor 1 ready-to-use gallon	STRENGTH/ APPLICATION
3:1	8 oz.	32 oz.	Maximum/Difficult Stains
15:1	2 oz.	8 oz.	Standard/Moderate Stains
30:1	1 oz.	4 oz.	Minimum/Light Stains & Sealed Surfaces

APPLICATION INFORMATION:

Cleanwhen air and surface temperatures are 40° F or above. If freezing conditions exist, allow time for the surface to thaw. If air temperature exceeds 90° F, flash cool the surface with water before applying product. Do not allow product to dry on a hot surface. Rinse thoroughly while cleaner is still wet on the surface. Always perform a pre-test (refer to Pre-Test Instructions).

Application Tools: mixing container or spray bottle, clean stiff bristle brush or broom, cold or hot water pressure washer with 25° to 40° tip or garden hose with nozzle

Application Instructions: S.R.B. is designed for one application cleaning and requires dilution before use (refer to Dilution Instructions). Stronger concentrations and additional cleanings may be needed to remove heavier, deep-set stains. Pour or spray dilution of S.R.B. on the stain(s). Let cleaner dwell on surface 5 – 10 minutes. Scrub surface with a brush or broom to agitate and break down stains. For brushless cleaning, apply diluted S.R.B. on the surface using two applications back-to-back. Rinse surface thoroughly. For best results, use a hot water pressure washer to draw out and further break down stains. A cold water pressure washer or garden hose with nozzle may be used as substitutes. Only use as much pressure needed to thoroughly clean surface. Excessive high pressures can damage substrate. Let surface dry. Inspect stain(s) to determine if additional spot cleaning is needed. Continue with overall cleaning of the surface with SureClean or Efflo Off.

CLEAN UP:

Rinsealltoolsand overspray thoroughly with water before product dries.
